PROFESSIONAL SUMMARY

Engineering trained technology professional with 3+ years of experience transitioning into AI Engineering, combining a Chemical Engineering foundation in process simulation and data driven, analytical problem solving with hands on software development in React.js and JavaScript. Proven track record of cross functional leadership at scale, translating complex technical and operational challenges into delivered, measurable outcomes across governance, student welfare, and freelance technology work. Bringing a fast learning, ownership driven approach to LLM application and agent focused AI Engineering roles.

- Transitioning into AI Engineering with a strong technology foundation spanning software development, Web3, digital technologies, and emerging AI applications.
- Analytical problem solver — a Chemical Engineering background sharpened into a systematic approach to complex problems, data, and process driven work.
- Fast learner who takes ownership — comfortable picking up new technologies, working across disciplines, and turning ideas into real world solutions.

CORE SKILLS

AI & Emerging Tech: Prompt engineering and AI tooling (foundational); actively building Python and machine learning fundamentals to support the AI Engineering transition; Web3 and digital innovation

Software & Web Development: React.js, JavaScript, Web Design, Web Development, HTML/CSS

Process Simulation & Data Modeling: Aspen HYSYS, MATLAB, numerical methods, LP/NLP optimization, process control and optimization

Data & Analysis: Data Analysis, UX Research, User Experience (UX) design, Microsoft Excel, Customer Relationship Management (CRM) tools

Leadership & Stakeholder Management: Cross functional Team Leadership, Strategic Planning, Program Management, Strategic Partnerships, Public Speaking, Conflict Resolution, Crisis Management, Community Management, Policy Development

PROFESSIONAL EXPERIENCE

Frontend Developer | Freelance — Fiverr & Upwork

Mar 2016 – Present

Remote

- Delivered React.js and JavaScript based web applications and interfaces for independent clients across Fiverr and Upwork, spanning web design, UX research, and data entry support.
- Sustained a decade long freelance track record, building a client reputation strong enough to keep work flowing long term — a foundation directly transferable to building user facing interfaces for AI products.
- Applied UX research and data analysis to shape client facing features, strengthening the ability to translate user needs into functional software, a core skill for AI product and agent interface design.

Process Engineer (Internship) | Dharmattan Nigeria Limited

Aug 2024 – Oct 2024 (3 months)

On site · Team of 50

- Optimized industrial processes through simulation, data analysis, and cross functional collaboration, applying Aspen HYSYS to model and troubleshoot process performance.
- Built hands on expertise in process design and troubleshooting within a compressed 3 month internship, reinforcing the systematic, data driven problem solving approach now being applied to AI Engineering.

LEADERSHIP & VOLUNTEER EXPERIENCE

Co-National Director (Youth) | Transformative Governance Forum

Jul 2025 – Present

- Provided strategic leadership and coordination for the Forum's Youth arm, helping stand up its strategic direction from the ground within the first year and positioning it as a credible platform for youth voice in governance conversations.

- Applied strategic planning, policy development, and public relations to build the arm's early credibility with youth and governance stakeholders.

Welfare Officer | Great Ife Students' Union (GIFESU), Obafemi Awolowo University Aug 2025 – Present
 Ile-Ife, Osun State, Nigeria • Population served: 35,000+ students

- Oversee welfare initiatives for a student population of over 35,000, taking direct responsibility for translating the office's mandate into visible, delivered support.
- Lead cross functional teams across policy development, health and welfare benefits administration, and community management to design and run welfare programs at scale.

Deputy Chief Security Officer | Great Ife Students' Union (GIFESU) Aug 2023 – Aug 2025
 Ile-Ife, Osun State, Nigeria

- Strengthened the Union's internal security and crisis response framework over two years, supporting security operations, conflict resolution, and policy implementation.
- Helped keep union operations and events running smoothly without major security incidents throughout the tenure.

Community Volunteer | American Institute of Chemical Engineers (AIChE) Jul 2023 – Present
 Team of 20

- Supported organization of AIChE student chapter events and technical workshops, growing student engagement with a more active and connected engineering community on campus.
- Connected members to industry insights and mentorship, promoting professional development among engineering students.

Student Volunteer | Society of Petroleum Engineers (SPE) International Sep 2020 – Present
 Team of 15

- Sustained 6 years of continuous involvement, becoming one of the more experienced student volunteers in the chapter.
- Facilitated networking between students, academia, and industry experts, and supported technical sessions and professional development programs.

Students Leader | Obafemi Awolowo University Sep 2019 – Present
 Ile-Ife, Osun State, Nigeria • Team of 20

- Built a 7 year track record of continuous student leadership, laying the foundation that led directly into senior union roles including Deputy Chief Security Officer and Welfare Officer.

EDUCATION

Bachelor of Engineering (BEng), Chemical Engineering

Obafemi Awolowo University (OAU), Ile-Ife, Nigeria | Sep 2019 – Aug 2026 (Expected)

- Targeting Second Class Upper (2:1) honours classification.
- Activities: Member, Nigeria Society of Chemical Engineers; Deputy Speaker, NSChE Student Body.

CERTIFICATIONS

- Professional Ethics — Corporate Finance Institute, 2022

LANGUAGES

English (Fluent)
